CASE STUDY: CONSTRUCTION

“This process saves us a lot time and money as the contractor workers can arrive onsite and get straight to work”

Noel Ò Connell, Senior HSEQ Advisor - Quadric

About: Quadric

24 Sites | 600+ Staff | 834 Contracting companies

Product: Rapid Global provides an end-to-end workforce management solution

The Challenge

Given the dynamic variety of construction works performed by Quadric, they needed a centralised online repository for storing all documents and information related to a contractor or contracting company. Additionally, a convenient method of reporting incidents and conducting audits was required.

The Solution

Rapid Induct was implemented at Quadric in conjunction with Rapid Contractor Management to help streamline their contractor engagement processes and take the pressure off the Project Managers and their HSEQ advisor.

“It allows us to ensure the required inductions have been completed by all workers before they arrive

on-site. We also have a copy of their driver’s licence, white card and work licence (if required) on file forever. This process saves us a lot time and money as the contractor workers can arrive onsite and get straight to work.”

Quadric love that using Rapid Contractor Management their Project Teams can log on at any time, anywhere and quickly review information about contractors they have engaged. They can even do this from the Rapid Global Admin Tools App on their phone or tablet. This functionality also extends to audits with Rapid Auditor.

“All project managers find this an extremely useful way of conducting audits of their project sites – in particular the ability to add photos.”

The Result

Quadric have found that Rapid Global “provides an all in one solution for compliance”. One of the factors that makes the solution is Rapid Incident Reporting, which they have found to be an invaluable tool in ensuring incidents are promptly raised and appropriately dealt with.

“Our favourite feature is that we can attach all incident related information like SWMS, induction records, photos etc. to that incident file. This is extremely beneficial when we demonstrate our reporting process to external auditors as we have all related information in one location and not spread across numerous folders.”

Quadric intend to continue utilising the Rapid products to help streamline their processes.
