Automate your contractor management

Integrate Rapid workforce management software with myBuildings, a facilities management solution from Core Vision.

Free support

Our Client Services Team are ready to help with your technical questions and to ensure you get the most out of your Rapid products.

Enhance your workforce management

Empower your facilities managers to streamline their contractor and job creation management.

New contractor sync	When a new contractor company is added to myBuildings, Rapid will automatically create a profile for the contractor in Contractor Management, and then invite them to register based on their personnel type in myBuildings.
Seamless work order management	Have work orders automatically populated in Rapid Permit To Work after they're created in myBuildings.
Automate visitor management	With site visits managed through Rapid Access, contractors can select the relevant myBuildings work order, answer set questions, add the required permits and update the work order's status all in the same system.
Improve compliance	Ensure only inducted and compliant contractor companies can receive work orders based on their compliance status within Rapid.

Boost efficiency with a fully integrated system

Remove manual handling and reduce risk with this powerful integration.

Reduce double handling	Use the Rapid system to automatically communicate with myBuildings and create a contractor or site profile.
Reduce human error	myBuildings will automatically create new sites in Rapid after they are created in myBuildings.
Block non-compliant suppliers	If a contractor is marked as non-compliant in Rapid, myBuildings will alert the user and they will be prevented from creating the work order.
Automated status updates	The contractor can advise if the work has been completed via Rapid Access, which is automatically sent to myBuildings to update the work order's status and mark it as completed and ready for payment.

Fully integrated modular workforce management software.

System requirements

Advanced security policies are applied in the integration between Rapid and myBuildings to ensure end-to-end data protection.

Rapid Global	Users require Rapid Contractor Management and Rapid Access with Permit to Work.
Core Vision	Users require Core Vision's myBuildings package.

Increase data privacy and security

Protecting your company's information is our highest priority. Rapid's information systems are ISO 27001 certified which demonstrates our commitment to industry standard protocols to safeguard your sensitive information.

ISO 27001 certified datacentres	Our data centres are committed to meeting the highest standards of information security and are ISO 27001 certified.
Encryption	The latest encryption methods are applied to prevent unauthorised access to data while at rest and in transit.
Two-factor authentication	Powered by Google Authenticator app, two-factor verification (2FA) provides an additional layer of protection, helping to secure your account against password breaches, keylogging, and other cybersecurity threats.
