

Revolutionise the way you welcome people to site

Rapid Access is a comprehensive check-in and screening tool that allows you to view and track all site visitors, employees and contractors staff in real-time from a single dashboard.

Leading global companies use Rapid Access to strengthen site safety, security, and compliance, mitigate risks and guard against unauthorised entry.

Free support

Our Client Services Team are ready to help with your technical questions and to ensure you get the most out of your Rapid products.

Keep track of who enters and exits your sites

Empower your administrators and managers with a digital sign-in solution that provides real-time visibility of employees, contractors and site visitors entering and exiting your facilities.

Intuitive dashboard	From a single dashboard administrators have real-time visibility of all site visitors entering or exiting your sites from any device, at any time.
Instant notifications	Receive notifications when site visitors check into your site, and real-time alerts if non-compliant personnel attempt to access your site.
Automated reporting	Keep your site and management personnel informed with automated reporting. Instantly receive data on who is on site at any time, how long they spend on site and much more.
Licence plate recognition <small>NEW</small>	Monitor vehicles entering your site, check insurance and vehicle registration in real-time and receive notifications when non-compliant vehicles attempt to enter your sites.
Assign a host	Connect your site visitors with a host to improve site security and safety especially for unmanned sites.
Rapid Global Admin Tools app	Spot-check audit a worker, see induction and training status, upload licences live in the field using your phone camera, verify or reject documents on the spot, take an ID photo and store documents.

Tailor the system to meet your exact business requirements

The software can be intelligently adapted to suit the requirements of your business. Our experienced team will configure the platform specifically to match your business needs.

Smooth Product Upgrades	Benefit from latest features and enhancements as soon as they become available.
Settings for advanced users	Fully customise your package with access to a wide range of helpful features and settings to fit your requirements.

Fully integrated modular workforce management software.

Improve site safety and emergency management processes

Streamline your emergency management processes with complete oversight of all employees, contractors, and site visitors.

Pre-screen visitors Customise your check-in form to include COVID-19 health screening questions and evacuation maps, site safety rules, or COVID-safe procedures.

Document management Upload and manage vaccination certificates and other compliance documentation.

Emergency evacuation Send automatic evacuation messages to all personnel on site and get 'safe' messages when they reach the muster point.

Beacon technology Easily manage entry and exit throughout your facility not just one access point. Assign individual permissions to specific personnel and set time limits for access to specific locations.

Contact tracing Quickly identify and trace suspected cases for contact tracing.

Capacity management Easily manage site capacity restrictions and social distancing.

Print labels Print wearable labels for a visual cue and easily identify site visitors, contractors, and suppliers.

Enhanced data privacy and security

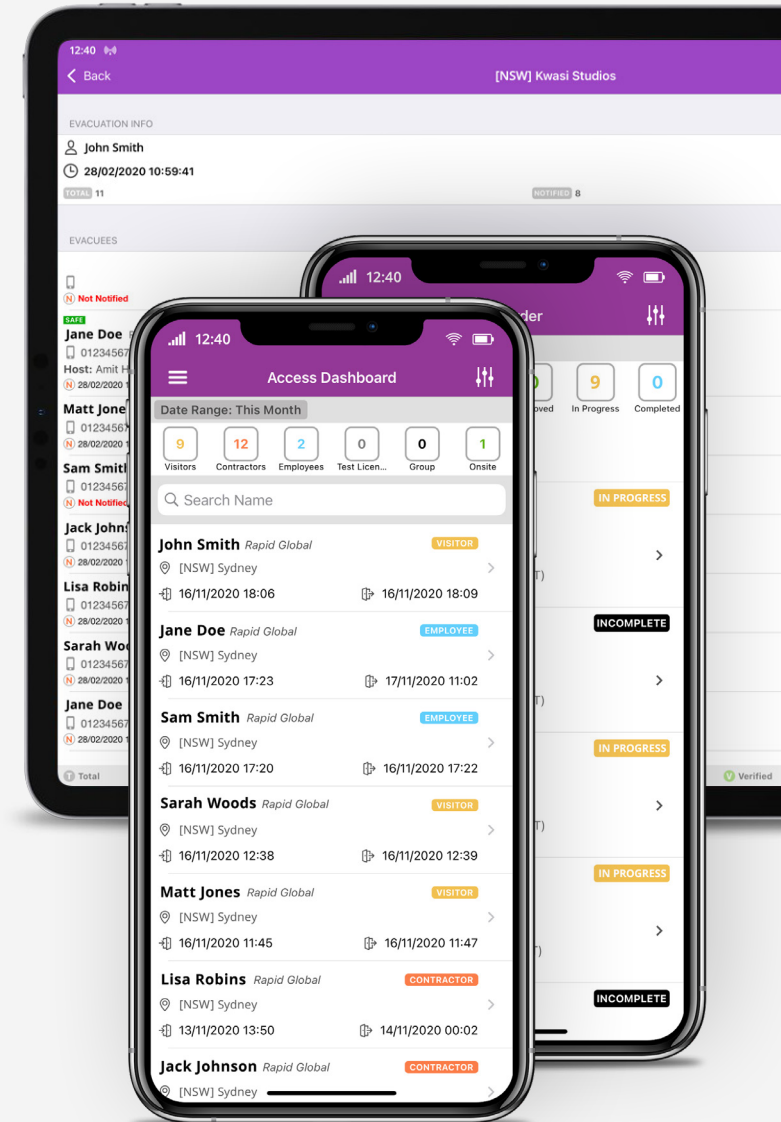

Protecting your company's information is our highest priority. Rapid's information systems are ISO 27001 certified which demonstrates our commitment to industry standard protocols to safeguard your sensitive information.

ISO 27001 certified datacentres Our data centres are committed to meeting the highest standards of information security and are ISO 27001 certified.

Encryption The latest encryption methods are applied to prevent unauthorised access to data while in transit and at rest.

Comprehensive access controls Built with comprehensive, permissions-based access controls which allow company administrators full control on who has access to your highly sensitive personal information and documentation.

Two-factor authentication NEW Powered by Google Authenticator app, two-factor verification (2FA) provides an additional layer of protection, helping to secure your account against password breaches, keylogging, and other cybersecurity threats.

Seamless integrations

Rapid's native and third-party integrations allow all your tools to work seamlessly together to automate and streamline your workplace safety and risk management processes.

Contractor and supplier management	Ensure contractors are compliant with valid insurances & documentation with Rapid Contractor Management.
Induction training	Check-in and screen all site attendees on arrival to ensure only compliant and authorised personnel gain access to your sites.
Work permits	Issue and validate work permits with Rapid Permit To Work.
Access control hardware	Rapid supports native integrations with hardware such as boom gates, turn-styles and swipe card entry systems, facial recognition, alcohol breath tester units and electronic key management systems.
Third-party applications	Rapid uses RESTful API allowing your business to access data and seamlessly integrate with your existing third-party software solutions.
