RapidContractor
Management

Transform the way you manage your contractor workforce.

Manage the full lifecycle of your contractor workforce with Rapid Contractor Management.

Our award-winning software supports you to scale your operations by automating your contractor onboarding and compliance processes.

Free support

Our Client Services Team are ready to help you with technical questions and ensure you get the most out of your Rapid products.

A single source of truth to manage your contractors.

Empower your operations team with a centralised contractor management software solution that can be intelligently adapted to suit the unique needs of your business and your industry.

Pre-qualification questionnaires	Tailor your pre-qualification questionnaire to suit various types of contractors based on risk profile. Ask questions related to contractor compliance and verify or request further information once submitted.
Centralised document storage	Collect, verify, and automatically track expiry dates of all types of compliance documentation; licenses, certificates, and insurance documents. Use our automated SWMS checklists to assist with verification of SWMS.
Automated reminder emails	The system automatically sends emails to the contracting company administrator when it is time to update their compliance documentation. Contractors are automatically flagged 'non-compliant' if documents are not uploaded within the timeframe.

Access critical safety and compliance data from anywhere, at any time.

Enjoy the assurance of knowing the status of every contracting company through Rapid's live dashboards and reports.

Real-time dashboard	View and filter information displayed in the dashboard by specific criteria such as compliance status, location, work type, and personnel type.
Verify contractor documentation	Review and approve or reject contractor compliance documents once they have been uploaded by the contracting company administrator.
Automated reports	Keep your site and management personnel informed with real-time reporting for current contractor compliance status.
Rapid App	Use the Rapid App to search for contracting companies, view compliance status, view compliance documentation, approve and reject documents, and suspend non-compliant companies. Capture and upload your documentation with the camera on your mobile device. Take your contractor management system with you on your own phone to the site.

Fully integrated modular workforce management software.

Enhanced onboarding experience for your contractors.

Empower your contractors to meet and maintain their compliance obligations with a seamless onboarding experience that allows them to complete their registration, verification, and onboarding before they arrive on site.

Dedicated contractor portal	A user friendly, online portal to enable your contractors to self-manage compliance processes from registration through to ongoing document control.
Live support	Rapid's Client Services Team are ready to help contractors with technical questions by email or telephone.
Online resources	Access a library of support content to help your contractors get the most out of Rapid's feature rich software.

Seamless integrations.

Rapid's native and third-party integrations allow all your tools to work seamlessly together to automate and streamline your workplace safety and risk management processes.

|	
Induction training	Ensure contractors are trained, inducted and compliant before they arrive onsite with Rapid Induct.
Site access control	Check-in and screen contractors and sub-contractors on arrival to ensure only compliant and authorised contractors gain entry with Rapid Access.
Issue work permits	Issue and validate work permits for contractors with Rapid Permit To Work.
Third-party applications	Rapid uses RESTful API, allowing your business to access data and seamlessly integrate with your existing third-party software solutions.

Fully integrated modular workforce management software.

Enhanced data privacy and security.

Protecting your company's information is our highest priority. Rapid's information systems are ISO 27001 certified which demonstrates our commitment to industry standard protocols to safeguard your sensitive information.

ISO 27001 certified datacentres	Our data centres are committed to meeting the highest standards of information security and are ISO 27001 certified.
Encryption	The latest encryption methods are applied to prevent unauthorised access to data while at rest and in transit.
Comprehensive access controls	Built with comprehensive "permissions based" access controls which allow company administrators full control on who has access to your highly sensitive personal information and documentation.
Two-factor authentication NEW	Powered by Google Authenticator app, two-factor verification (2FA) provides an additional layer of protection, helping to secure your account against password breaches, keylogging, and other cybersecurity threats.

Tailor the system to meet your exact business requirements.

The software can be intelligently adapted to suit the requirements of your business.
Our experienced team will configure the platform specifically to match your business needs.

Smooth product upgrades	Benefit from latest features and enhancements as soon as they become available.
Settings for advanced users	Fully customise your package with access to a wide range of helpful features and settings to fit your requirements.
