

Revolutionise the way you welcome visitors to your workplace

Rapid GO is a simple, safe mobile solution that allows your employees, contractors, and site visitors to check-in without touching anything.

Leading global companies use Rapid GO to strengthen site safety, security, and compliance, mitigate risks and keep the workplace safe from unauthorised entry.

Free support

Our Client Services Team are ready to help you with technical questions and ensure you get the most out of your Rapid products.

Effortless front desk check-in for your visitors

Welcome your visitors with a check-in solution that's simple to install and easy to use so you can focus on doing business.

Quick setup	Simply create an account and implement across multiple sites.
Optional wireless label printing NEW	Enable easy identification of site visitors with instant label printing.
QR code check-in	On arrival, anyone entering your workplace simply scans the QR code to check-in using their own device.
Pre-screen arrivals	Collect critical information specific to your site, including compliance documentation, with fully customisable entry questions.
Safety alerts	Display safety alerts for specific sites, companies, or individuals for a specified time.

Keep track of who enters and exits your site

Empower your administrators and managers with a digital sign-in solution that provides real-time visibility of employees, contractors and site visitors entering and exiting your facilities.

Intuitive dashboard	From a single dashboard, administrators have real-time visibility of all site visitors entering or exiting your sites from any device, at any time.
Instant notifications	Receive notifications when visitors check into your site, and alerts if a visitor fails the entry questions.
GPS sign-in	Enable your staff and repeat site attendees to skip the queue and check-in swiftly using GPS technology.
Automated reporting	Keep your site and management personnel informed with automated reporting. Instantly receive data on who is on site at any time, how long they spend on site and much more.
Assign a host	Manage your unmanned entry points by connecting your site visitors with a company contact to improve site security and safety.

Fully integrated modular workforce management software

Improve site safety and emergency management processes

Streamline your emergency management processes with complete oversight of all site visitors. Manage infection control and keep your workplace safe.

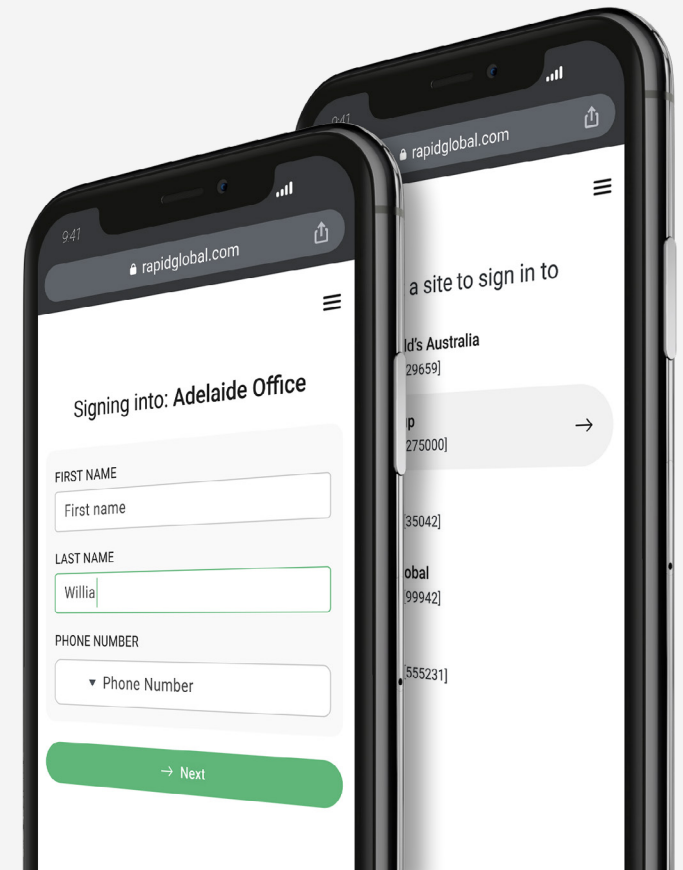

Contactless check-in	Minimise the spread of infectious viruses and diseases by going contactless. On arrival, site visitors scan the QR code with their own device, limiting the need to touch anything.
Pre-screen visitors	Customise your check-in form to include health screening questions, evacuation maps, site safety rules, or safety procedures.
Store documents online	Upload and manage vaccination certificates and other compliance documentation.
Capacity management	Easily manage site capacity restrictions and social distancing.

Seamless integrations

Rapid's native and third-party integrations allow all your tools to work seamlessly together to automate and streamline your workplace safety and risk management processes.

Contractor and supplier management	Ensure contractors and suppliers entering your sites are fully compliant with valid licences and documentation with Rapid Contractor Management.
Induction training	Check that your site visitors, employees, and contractors have the relevant qualifications and up to date inductions before gaining access to your workplace with Rapid Induct.
Issue work permits	Ensure that only authorised people are able to carry out high-risk work on your site with Rapid Permit To Work.
Third-party applications	Rapid uses RESTful API, allowing your business to access data and seamlessly integrate with your existing third-party software solutions.

Fully integrated modular workforce management software

Enhanced data privacy and security

Protecting your company's information is our highest priority. Rapid's information systems are ISO 27001 certified which demonstrates our commitment to industry standard protocols to safeguard your sensitive information.

ISO 27001 certified data centres

Our data centres are committed to meeting the highest standards of information security and are ISO 27001 certified.

Encryption

The latest encryption methods are applied to prevent unauthorised access to data while at rest and in transit.

Comprehensive access controls

Built with comprehensive access controls which allow company administrators full control on who has access to your highly sensitive personal information and documentation.

Two-factor authentication

Two-factor verification (2FA) provides an additional layer of protection, helping to secure your account against password breaches, keylogging, and other cybersecurity threats.

NEW
