Rapid GO

Revolutionise the way you welcome visitors to your workplace.

Rapid GO is a simple, safe mobile solution that allows your employees, contractors, and site visitors to check-in without touching anything.

Leading global companies use Rapid GO to strengthen site safety, security, and compliance, mitigate risks and keep the workplace safe from unauthorised entry.

Free support

Our Client Services Team are ready to help you with technical questions and ensure you get the most out of your Rapid products.

Effortless front desk check-in for your visitors.

Welcome your visitors with a check-in solution that's simple to install and easy to use so you can focus on doing business.

Quick setup	Simply create an account and implement across multiple sites.
No hardware required	There are no additional costs for hardware such as kiosks or iPads, so you can get your visitor management system up and running quickly.
QR Code check-in	On arrival, anyone entering your workplace simply scans the QR code to check-in using their own device.
Pre-screen arrivals	Collect critical information specific to your site with fully customisable entry questions, COVID-19 screening and collect compliance documentation.
Safety alerts	Display safety alerts for specific sites, companies, or individuals for a specified time.

Keep track of who enters and exits your site.

Empower your administrators and managers with a digital sign-in solution that provides real-time visibility of employees, contractors and site visitors entering and exiting your facilities.

Intuitive dashboard	From a single dashboard, administrators have real-time visibility of all site visitors entering or exiting your sites from any device, at any time.
Instant notifications NEW	Receive notifications when visitors check into your site, and alerts if a visitor fails the entry questions.
GPS sign-in	Enable your staff and repeat site attendees to skip the queue and check-in swiftly using GPS technology.
Automated reporting	Keep your site and management personnel informed with automated reporting. Instantly receive data on who is on site at any time, how long they spend on site and much more.
Assign a host	Manage your unmanned entry points by connecting your site visitors with a company contact to improve site security and safety.

Fully integrated modular workforce management software.

Improve site safety and emergency management processes.

Streamline your emergency management processes with complete oversight of all site visitors. Manage infection control and keep your workplace COVID-safe.

Contactless check-in	Minimise the spread of infectious viruses and diseases by going contactless. On arrival, site visitors scan the QR code with their own device, limiting the need to touch anything.
Pre-screen visitors	Customise your check-in form to include COVID-19 health screening questions, evacuation maps, site safety rules, or COVID-safe procedures.
Store documents online `NEW`	Upload and manage vaccination certificates and other compliance documentation.
Links to State Government QR apps `NEW`	Rapid GO links with Government Contact Tracing systems.*
Contract tracing `NEW`	Quickly identify and trace suspected cases for contract tracing.
Capacity management	Easily manage site capacity restrictions and social distancing.

*Feature available in Australia, excluding Queensland.

Seamless integrations.

Rapid's native and third-party integrations allow all your tools to work seamlessly together to automate and streamline your workplace safety and risk management processes.

|	
Contractor and supplier management	Ensure contractors and suppliers entering your sites are fully compliant with valid licences and documentation with Rapid Contractor Management.
Induction training	Check that your site visitors, employees, and contractors have the relevant qualifications and up to date inductions before gaining access to your workplace with Rapid Induct.
Issue work permits	Ensure that only authorised people are able to carry out high-risk work on your site with Rapid Permit To Work.
Third-party applications	Rapid uses RESTful API, allowing your business to access data and seamlessly integrate with your existing third-party software solutions.

Fully integrated modular workforce management software.

Enhanced data privacy and security.

Rapid uses Australian-based data centres that are operated by tier one providers. Multiple layers of protection are distributed across secure and reliable infrastructure to keep your visitor information confidential and secure.

ISO 27001 certified data centres	Our data centres are committed to meeting the highest standards of information security and are ISO 27001 certified.
Encryption	The latest encryption methods are applied to prevent unauthorised access to data while at rest and in transit.
Comprehensive access controls	Built with comprehensive access controls which allow company administrators full control on who has access to your highly sensitive personal information and documentation.

Install and forget or customise to meet your exact requirements.

Rapid GO's default settings provide a comprehensive visitor management system right from the start or fine-tune your package with a wide range of detailed settings.

Smooth product upgrades	Benefit from latest features and enhancements as soon as they become available.
Settings for advanced users	Fully customise your package with access to a wide range of helpful features and settings to fit your requirements.
Only billed for what you use	We will only charge you when people sign into your site, perfect for annual events.
